CUSTOM PRODUCTS & MANUFACTURING

We are happy to help you bring your custom leather product idea to life. We work with our clients to design and manufacture custom leather goods to fit their needs. These projects require planning, design time, and custom tooling fees. We are always open to talking with you about your needs but do not offer this for individual items. We require a minimum production run of at least 100 pieces for custom products and require larger runs for contract manufacturing. Each project is quoted based on the project details, tooling, and staff training needed to fill the order.

SPECIAL GLASSWARE OR BOTTLE

You send us the item and we will create a custom sleeve or carrier to your specifications.

CUSTOM ITEMS

Found inspiration online? Send us the pic and we can create a custom product just for you! Specialty keychains, tool rolls and restaurant presentation boards - You name it, and we will do our best to make it!

CONTRACT MANUFACTURING

Already have a custom product, but can't keep up with production. Oowee can help you out.

- Die Cut Materials
- Add a logo to leather
- Industrial Sewing
- Specialty Leather

PRODUCTION & IMPRINT OPTIONS

Oowee Products makes all items custom to order, at the time of the order. We are offering quality bespoke, American-made leather goods. Please understand we do not hold inventory, each item is made once the order is placed.

IMPRINT METHODS

Our main imprint method is DEBOSSING. We use heat and pressure to add the logo into the leather. We have to make a metal "branding head" for each logo.

All items have a specific imprint area size. Each set-up charge is a one-time fee when ordering exact repeats.

LEATHER COLOR VARIATIONS

ADD A POP OF COLOR WITH A HOT FOIL STAMP

- This method works best with simple logos without small details.
- We stock Black, Silver and Gold foil options
- Need a specialty color? Let us know and we can see what we can get for you
- We are NOT able to do PMS Color Matching with this method

LASER ENGRAVING FOR WOOD PRODUCTS

- This process is reserved for wood items and small retail orders
- This burns the logo into the material using light. There is some charring that occurs
